Claims 1-24 are currently pending in this application.

Terminal Disclaimer

2. The terminal disclaimer filed on July 22, 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 7,224,769 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

3. Claims 1-24 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because prior art fails to teach or make obvious a portable x-ray device, comprising: a housing with a first portion that contains an x-ray source that is powered by an integrated power system that provides a continuous, high voltage DC

power and the housing also contains an internal power source as claimed in combination with all of the remaining limitations of the claim.

Claim 10 is allowed because prior art fails to teach or make obvious a handheld x-ray device, comprising: a housing with a first portion that contains an x-ray source and that is powered by an integrated power system that provides a continuous, high voltage DC power; and the housing also has a second portion that contains an internal power source as claimed in combination with all of the remaining limitations of the claim.

Claim 14 is allowed because prior art fails to teach or make obvious a system for x-ray analysis, the system containing a portable x-ray device with a housing containing an x-ray source that is powered by an integrated power system that provides a continuous, high voltage DC power and which includes a plurality of power supplies, wherein the housing also contains an internal power source as claimed in combination with all of the remaining limitations of the claim.

Claim 17 is allowed because prior art fails to teach or make obvious a method for making a portable x-ray device with a high current load, the method comprising: providing an integrated power system that provides a continuous, high voltage DC power in the first portion of the housing and connecting it to the x-ray source; providing an internal power source in a removable, second portion of the housing; and connecting the second portion to the first portion as claimed in combination with all of the remaining limitations of the claim.

Claim 19 is allowed because prior art fails to teach or make obvious a method for analysis, comprising: providing a handheld x-ray device with a high current load, the device having a housing that contains an x-ray source that is powered by an integrated power system that provides a continuous, high voltage DC power and the housing also contains an internal power source as claimed in combination with all of the remaining limitations of the claim.

Claim 21 is allowed because prior art fails to teach or make obvious a method for dental imaging, comprising: providing a portable x-ray device having a housing that contains an x-ray source that is powered by an integrated power system that provides a continuous, high voltage DC power and the housing also contains an internal power source as claimed in combination with all of the remaining limitations of the claim.

Claim 23 is allowed because prior art fails to teach or make obvious a handheld x-ray device, comprising: a housing having a first portion that contains an x-ray source that is powered by an integrated power system that provides a continuous, high voltage DC power and which includes a plurality of power supplies; the housing also having a second portion that contains an internal power source and the second portion is removably attached to the first portion so that when the second portion is removed from the first portion as claimed in combination with all of the remaining limitations of the claim.

Claims 2-9, 11-13, 15, 16, 18, 20, 22 and 24 are allowed by virtue of their dependence.
